LESSON 5-7 · SESSION 2 · PRACTICE · FORM B

Surface Area of Triangular Prisms

Learning target – I can find the surface area of a triangular prism using its net. · 6.G.A.4

REMEMBER

- A triangular prism has **2 triangle ends** and **3 rectangles**: **5 faces**.
- Triangle end: ½ × base × **height**. In a right triangle, the legs are base and height.
- Each rectangle: a triangle **side** × the prism's **length**.

WORKED EXAMPLE

Prism 6 ft long; ends: base 8 ft, height 3 ft, sides 5 ft.

Step 1 Ends: 2 × (½ × 8 × 3) = 24 ft².

Step 2 Rectangles: (8 + 5 + 5) × 6 = 108 ft².

Step 3 Add: 24 + 108 = 132.

Answer **SA = 132 ft²**

WORDS **triangular prism** *(prisma triangular)* · **lateral face** *(cara lateral)* · **surface area** *(área superficial)*

PRACTICE

show your work · label units

1. Find each area.

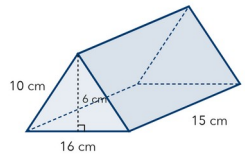

a. 2 ends, base 10 ft, height 6 ft: ___ ft²

b. rectangle 7 ft by 12 ft: ___ ft²

c. 2 ends of 15 cm² each: ___ cm²

d. rectangles 6, 8, 10 cm by 5 cm: ___ cm²

2. **Candy Box.** Both slanted sides of this candy box are 10 cm.

a. Area of both triangle ends _____ cm²

b. Area of the three rectangles _____ cm²

c. Surface area _____ cm²

Show your work.

3. **Ramp Wedge.** A wedge is a triangular prism 10 cm wide. Its ends are right triangles with sides 8, 15, and 17 cm. Find its surface area.

Show your work.

Answer_____ cm²

4. **Cheese Wedge.** A cheese wedge is a prism 5 cm thick. Its ends are right triangles with sides 6, 8, 10 cm. Find its surface area.

Hint *The 5 cm is one side of every rectangle.*

Show your work.

Answer_____ cm²

5. Priya's Ends. A prism is 18 in long. Each end has base 10 in and height 12 in. Priya says both ends cover 60 in². Is she right?

Hint *How many triangle ends does a prism have?*

Show your work.

Answer_____ in²

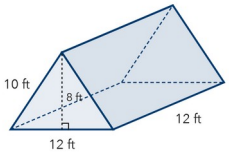

6. Roof Piece. A roof piece is a prism 20 ft long. Each end: base 24 ft, height 16 ft, two 20 ft sides. Find its SA.

Show your work.

Answer_____ ft²

7. Planter Wedge. Find the surface area of the planter.

Hint *Height for the triangles, sides for the rectangles.*

Show your work.

Answer_____ ft²

8. Camping Tent. A tent is a triangular prism 12 ft long. Each end: base 6 ft, height 4 ft, two 5 ft sides. The floor is 6 ft by 12 ft.

a. Area of the two ends _____ ft²

b. Total surface area _____ ft²

c. Fabric needed with no floor _____ ft²

Show your work.

FIND THE ERROR

explain the mistake, then fix it

9. Felix's Work. A triangular prism is 10 ft long. Each end has a base of 6 ft, a height of 4 ft, and two 5 ft sides. Felix found the rectangles as 6 × 10, 4 × 10, and 4 × 10. Explain the mistake and find the surface area.

_____

_____

_____

TEST PRACTICE

choose the best answer

10. How many faces does a triangular prism have in all?

A 3 **B** 5 **C** 6 **D** 9

11. All three rectangles in a triangular prism's net share one side length: the –

A triangle's height

B prism's length

C triangle's base

D slanted side

SELF-CHECK CODE *find your answer · copy its letter into that problem's box · spell a math word*
